EDUCATION

Bachelor of Science in Software Engineering

Expected Graduation May 2027

San Jose State University, San Jose CA

Relevant Coursework: Discrete Math, Data Structures and Algorithms, Object Oriented Programming, Operating Systems, Database Management, Linear Algebra.

EXPERIENCE

Web Developer, [IAU San Jose Campus](#)

March 2026 - August 2026

- Designed, coded, and deployed a full website for the new San Jose campus of the International American University using React.
- Used Stripe for payment processing, Supabase for school application processing, and Ionos VPS for website deployment.

Material Management Partner I, *General Dynamics OTS*

Jun 2026 - August 2026

- Maintained accurate inventory records and completed material tracking tasks using Microsoft Excel.
- Used Outlook, Teams, and other Microsoft Office applications to communicate with multiple departments and support daily administrative operations.
- Conducted inventory counts, identified record discrepancies, and coordinated with departments to maintain accurate material information.

Geek Squad Consultation Agent, *Best Buy*

Nov 2025 - Jan 2026

- Diagnosed and resolved hardware, software, OS, and network issues across Windows, macOS, and mobile platforms using structured troubleshooting methods.
- Provided technical support for OS reinstalls, driver updates, malware removal, and data recovery while clearly communicating technical solutions to users.
- Collaborated in a fast-paced environment to triage issues, document resolutions, and strengthen debugging and analytical problem-solving skills.

ENGINEERING PROJECTS (More projects available on Github)

EPA ESA Pesticide Mitigation Web App (SQL, JavaScript, Figma, React)

- Led user research for a 3-person team to design a centralized web platform helping farmers identify compliant pesticide options by region and regulation.
- Designed and iterated on interactive Figma prototypes, incorporating user feedback to improve usability and workflow efficiency.

Reef Guardian Side Scroller Single Player Video Game (Java, LibGDX, GIMP, Adobe Audition)

- Served as system architect on a 5-person team, designing UML diagrams and flowcharts to model game mechanics and object interactions.
- Developed gameplay logic, debugging, and performance optimization as a supporting developer.
- Applied object-oriented programming principles to implement level progression, collision handling, and player-environment interactions.

Edubase (SQL, Java, JavaFX, Javascript, Figma)

- Designed application interfaces in Figma and translated designs into FXML views integrated with Java controllers.
- Developed a CRUD-based database application to store, search, edit, and manage student records using SQL and Java.

SKILLS

Programming Languages and OS: Java, Python, JavaScript, C++, SQL, HTML, Windows, Linux, Chrome

Frameworks & Tools: React, React Native, Node.js, Express.js, JavaFX, Git, VS Code, IntelliJ, LibGDX, Supabase, Vercel, Ionos VPS, Stripe

Software Engineering Concepts: Data Structures & Algorithms, Object-Oriented Design (OOD), RESTful APIs, MVC & Design Patterns, Debugging & Unit Testing, SDLC, Agile/Scrum, Client-Server Architecture, Authentication & Authorization, Database Design, State Management, API Integration, Version Control, Cloud Fundamentals

Design / UI: Figma, FigJam, GIMP, Adobe Audition, Video Compression, Video processing
